Front-End

- JavaScript
- AngularJs
- HTML5
- CSS
- BootStrap
- JQuery
- Angular

Back-End

NodeJs
ExpressJs
MongoDB

Other Skills

Git
Native Fluency In Spanish
Socket.io

Projects:

Last FM Music Project - Worked with the Last Fm API. Applied JavaScript, BootStrap, CSS, and Angular to perform requests to the API. This allows the user to see what music they recently listened to on Spotify. They are also able to see the Top Artists.

Omelet Haven- Created a Full Stack CRUD application that allows the user to save omelet recipes, and view existing recipes in a MongoDB database.

Troll Patrol - Used WebSockets, and User Authentication to make an instant messaging application for people to argue about the topic of the day.

EXPERIENCE

Liberty University - Academic Advisor:

- Managed bilingual caseload of 600 students.
- Created academic goals for students in completing their degrees.
- Earned over 2 million dollars for the company during a one month competition by securing student payments for courses.

IMB - Intern :

- Manufactured affordable water filters for Indonesian locals in Palembang, Jakarta.
- Taught English to university students.
- Conducted ethnographic research between different ethnicities in Indonesia.

EDUCATION

V-School : MEAN Stack Web Development Program (Salt Lake City, UT), 2017

BACHELOR OF SCIENCE: Global Studies - Liberty University (Lynchburg, VA), 2011 – 2015
